

# Used Equipment Refurbishment

## Quality and service only possible from the manufacturer

DISCO offers a complete service from the buyback of used equipment and refurbishment to resale.

Our specialist engineers will take full responsibility in refurbishing equipment and provide high quality products and service to meet your needs.

If you wish to sell used equipment or purchase refurbished equipment, please feel free to contact us.

## Advantages of DISCO's used equipment buyback and refurbishment service

### Genuine manufacturer quality

Specialist engineers will perform the equipment refurbishment and guarantee its accuracy. Identical to when purchasing a new unit, we offer our test cut services to select optimal processing conditions.

We offer user-specified specifications in accordance with your requirements.

### Reducing the burden of investment

This system reduces the burden of your investment by providing equipment with a short delivery time and at a low cost.

### After service

Maintenance support will be conducted by DISCO's engineers so that you can continue to use your equipment for a long time.

### Reducing the burden on the environment

This system can reduce the burden on the environment from a recycling and reusing point of view.

### DISCO's Network

Equipment buyback and trade-in is available via DISCO's global network.

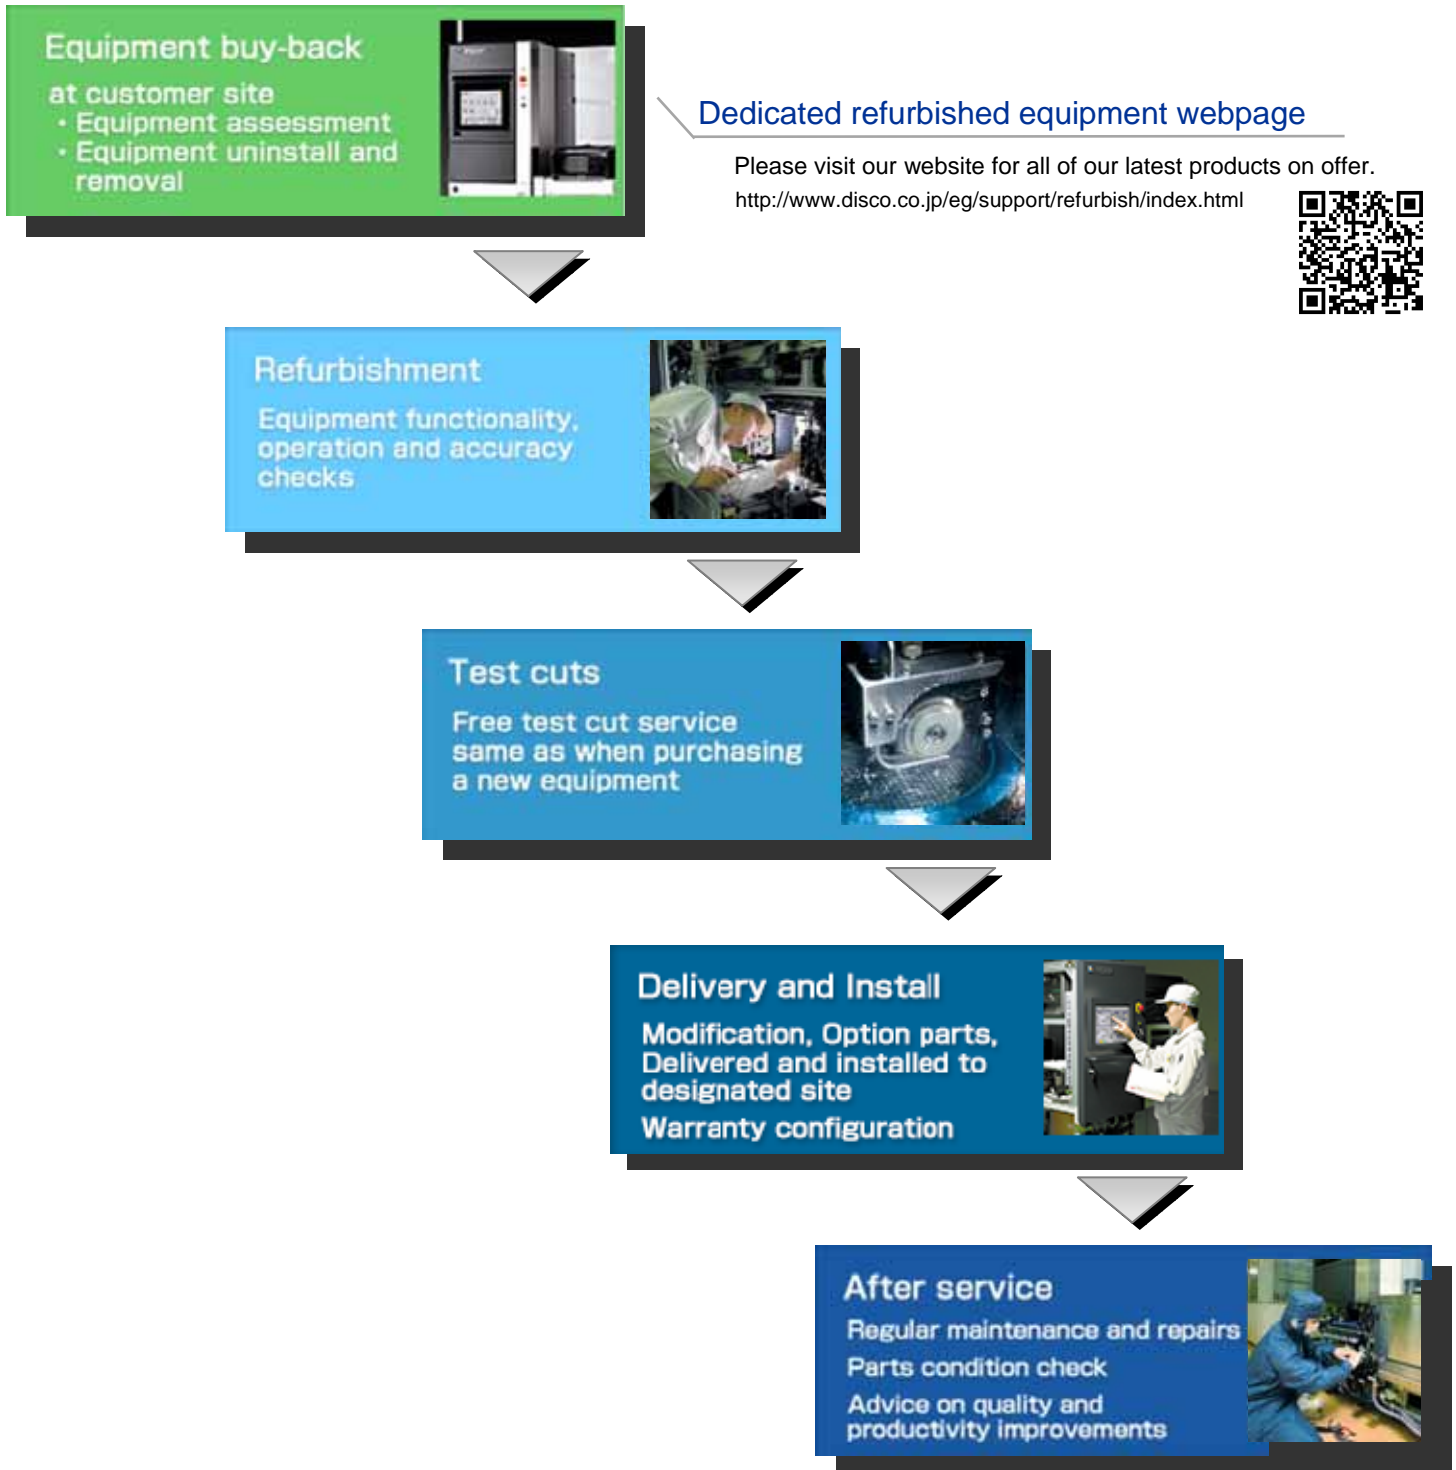

### Cost advantages

In addition to making use of idle resources, the buyback price can be applied towards the purchase price of new equipment when replacing older equipment.

# Used Equipment Refurbishment

## Used equipment: From buyback to your manufacturing site

We will provide total support from buyback to resale and after service identical to what we provide for new equipment.
